

## Polydac-12

Polydac-12 is a hollow braided, 12-strand pulling rope made from a polyester/polyolefin dual-fiber blend. The polyester is veneered around the polyolefin core to provide excellent UV and abrasion resistance. Its parallel-lay single braid construction offers a high strength-to-weight ratio, excellent handling and grip, easy splicing, and reliable pulling performance.

### Polydac-12

Part Number	Length (ft.)	Diameter (In.)	Circumference (In.)	Weight (Per 100ft.)	Average Strength (lbs.)	Min. Break Strength (lbs.)
